2016-2020 Latvia Infectious Disease Testing Market: Volume and Sales Forecasts for 100 Tests, Competitive Strategies, Innovative Technologies, Opportunities for Suppliers

Description: This new report is designed to help current suppliers and potential market entrants identify and evaluate business opportunities emerging in the infectious disease testing market during the next five years. The report reviews current and emerging assays; analyzes potential applications of innovative diagnostic technologies; forecasts volume and sales for over 100 infectious disease tests; provides test volume estimates by method (molecular, serology/immunodiagnostics, culture/microscopy); profiles leading players and potential market entrants; and suggests alternative business expansion strategies for suppliers.

Rationale

This comprehensive report will assist diagnostics industry executives, as well as companies planning to diversify into the dynamic and rapidly expanding infectious disease testing market, in evaluating emerging opportunities and developing effective business strategies.

The infectious disease testing is one of the most rapidly growing segments of the in vitro diagnostics industry, and the greatest challenge facing suppliers during this decade. Among the main driving forces is continuing spread of AIDS, which remains the world's major health threat and a key factor contributing to the rise of opportunistic infections; threat of bioterrorism; advances in molecular diagnostic technologies; and a wider availability of immunosuppressive drugs. Although for some infections the etiology is still a mystery, while for others the causative microorganisms are present in minute concentrations long before the occurrence of first clinical symptoms, recent advances in genetic engineering and detection technologies are creating exciting opportunities for highly sensitive, specific and cost-effective products.

Infectious Diseases Analyzed in the Report

Current and Emerging Products

- In-depth examination of over 100 major diseases, including their etiology, current diagnostic tests, vaccines, drugs and market needs.

- Review of major analyzers used for infectious disease testing, including their operating characteristics, features and selling prices.

Technology Review

- Assessment of molecular diagnostic, monoclonal antibody, immunoassay, and other technologies and their potential applications for infectious disease testing.

- Companies developing or marketing infectious disease diagnostic products by individual test.

Opportunities and Strategic Recommendations

- Emerging opportunities for new instrumentation, reagents kits, IT and other products with significant market appeal during the next five years.
- Design criteria for decentralized testing products.

- Alternative market penetration strategies.

- Potential market entry barriers and risks.

Competitive Assessments

- Strategic assessments of major suppliers and emerging market entrants, including their sales, product portfolios, marketing tactics, collaborative arrangements and new products in R&D.

Contains 950 pages and 125 tables

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/3715114/](http://www.researchandmarkets.com/reports/3715114/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Product Name: 2016-2020 Latvia Infectious Disease Testing Market: Volume and Sales Forecasts for 100 Tests, Competitive Strategies, Innovative Technologies, Opportunities for Suppliers
