Opportunities for the Global High Temperature Adhesives Market 2016-2021: Trends, Forecasts and Opportunity Analysis

Description: According to a new market report the future of the global high temperature adhesives market looks attractive with growing electrical and electronics market and rising automotive production. The global high temperature adhesives market is forecast to grow at a CAGR of 4% from 2016 to 2021. The major growth drivers for this market are the growth in electrical and electronics industry, and increasing automotive production. The printed circuit board (PCBs) makes the use of high temperature adhesives in the bonding of surface mount-components, wire tacking, and potting and encapsulating electronic components.

In this market, epoxy, silicone, acrylic, and other high temperature adhesives are used for electrical and electronics, automotive, aerospace, marine, and construction applications. The author predicts that the demand for epoxy based high temperature adhesive is expected to remain the largest segment due to its ability to withstand higher temperatures of up to 200 degree Celsius. On the basis of its comprehensive research, the author forecasts that the epoxy based high temperature adhesive are expected to depict highest growth during the forecast period as they provide excellent adhesion, versatility, good electrical properties, compatibility, resistance to weathering, and ease of application that can readily be tailored according to the demand of manufacturers.

Within the high temperature adhesives market, the electrical and electronics segment is expected to remain the largest segment by value and volume consumption. Growing demand for PCBs from telecommunication, computer/peripherals, consumer, and microelectronic assembly applications, miniaturization of IC chips, and a rapid move towards smaller and higher-performance electronic devices is expected to spur growth for this segment over the forecast period.

Asia Pacific is expected to remain the largest market due to an increase in the production of printed circuit board in China, Taiwan, Japan, and South Korea and the use of high temperature adhesives in the assembly and packaging of electronic circuits.

North America and Rest of the World are expected to witness significant growth over the forecast period due to new technological developments will be explored by high temperature adhesive manufacturers to meet consumers' demand.

For market expansion, the report suggests innovation and new product development, where the unique features of high temperature adhesives can be capitalized. The report further suggests the development of partnerships with customers to create win-win situations and the development of low-cost solutions for end users.

Emerging trends, which have a direct impact on the dynamics of the market, includes the new silicone-based electrically conductive adhesives in automotive sensor applications, development of fast cure and high temperature resistant adhesives, and replacement of lead solder with electrically conductive adhesives. Henkel AG & Co KGaA, 3M Company, Avery Dennison Corporation, Master Bond Inc., and Permabond are among the major suppliers of high temperature adhesives. There are some companies that are opting for merger & acquisition as strategic initiatives for driving growth.

The author has analyzed the global high temperature adhesives market by application type, polymer type, technology type, product form and region, has come up with a comprehensive research report, “Opportunities for the Global High Temperature Adhesives Market 2016-2021: Trends, Forecast, and Opportunity Analysis”

The report serves as a springboard for growth strategy, as it provides a comprehensive data and analysis on trends, key drivers, and directions. The study includes a forecast for the global high temperature adhesives market through 2021, segmented by application type, polymer type, technology type, product form and region, as follows:

By application type [Volume (Million Pounds) and $ Million shipment from 2010 to 2021]:
- Electrical and electronics
- Automotive
By polymer type [Volume (Million Pounds) and $ Million shipment from 2010 to 2021]:
- Epoxy based high temperature adhesive
- Silicone based high temperature adhesive
- Acrylic based high temperature adhesive
- Other high temperature adhesive (Polyamide and polyolefin)

By technology type [$ Million shipment from 2010 to 2021]:
- Reactive
- Solvent based
- Hot Melt
- Film

By region [Volume (Million Pounds) and $ Million shipment from 2010 to 2021]:
- North America
- Europe
- Asia Pacific
- Rest of World

By product form [$ Million shipment for 2015]:
- Paste
- Liquid
- Film

This report answers following 11 key questions:
Q.1. How big the opportunities for high temperature adhesives market by applications and regions?
Q.2. Which segments will grow at a faster pace and why?
Q.3. Which region will grow at a faster pace and why?
Q.4. What are the key factors affecting market dynamics? What are the drivers and challenges of the market?
Q.5. What are the business risks and threats of this market?
Q.6. What are emerging trends in this market and reasons behind them?
Q.7. What are some changing demands of customers in the market?
Q.8. What are the new developments in the market? Which companies are leading these developments?
Q.9. Who are the major players in this market? What strategic initiatives are taken by key players for business growth?
Q.10. How is the competitive rivalry and threat of substitution in this market?
Q.11. How many M & A activities happened during last 1-2 years and what are their impacts?

This unique report will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today’s stringent economy, you need every advantage that you can find.

To make business, investment, and strategic decisions, you need timely, useful information. This market report fulfills this core need and is an indispensable reference guide for multinational materials suppliers, product manufacturers, investors, executives, distributors, and many more that operate in this market.

Some of the features of “Opportunities for the Global High Temperature Adhesives Market 2016-2021: Trends, Forecast, and Opportunity Analysis” include:
- Market size estimates: High temperature adhesives market estimation in terms of volume (M lbs.) and value ($B) shipment.
- Segmentation analysis: High temperature adhesives market size by various application types such as electrical & electronics, automotive, aerospace and others and various polymer types such as acrylic, silicone, epoxy and others both in terms of volume and value shipment.
- Regional analysis: High temperature adhesives market breakdown by key regions such as North America, Europe, Asia Pacific, and Rest of World.
- Growth opportunities: Analysis on growth opportunities in different applications and regions.
- Strategic analysis: This includes M&A, new product development, competitive landscape, and expansion
strategies of high temperature adhesives suppliers in global high temperature adhesives market.
- Emerging applications: Emerging applications of high temperature adhesives in global high temperature adhesives market.
- Analysis of competitive intensity of the industry based on Porter's Five Forces model.

Contents:

1. Executive Summary

2. Industry Background and Classifications
   
   2.1: Introduction
   
   2.1.1: Applications of the Global High Temperature Adhesive Market
   2.1.2: Classification of the Global High Temperature Adhesives by Polymer Type
   2.1.3: Advantages of High Temperature Adhesive Usage
   2.1.4: Difficulties of High Temperature Adhesive Usage
   2.1.5: Comparison of Adhesives with Mechanical Fasteners (Substitutes)
   
   2.2: Supply Chain

3. Market Trends and Forecast Analysis

   3.1: Market Analysis 2015
   
   3.1.1: The Global High Temperature Adhesive Market by Value and Volume
   3.1.2: Regional Markets for the Global High Temperature Adhesives by Value and Volume
   
   3.2: Market Trend 2010-2015
   
   3.2.1: Macroeconomic Trends
   3.2.2: Trends of the Global High Temperature Adhesive Market by Value and Volume
   3.2.3: Trends of the North American High Temperature Adhesive Market by Value and Volume
   3.2.4: Trends of the European High Temperature Adhesive Market by Value and Volume
   3.2.5: Trends of the APAC High Temperature Adhesive Market by Value and Volume
   3.2.6: Trends of the ROW High Temperature Adhesive Market by Value and Volume
   3.2.7: External Forces Shaping the Global High Temperature Adhesive Market
   3.2.8: Industry Drivers and Challenges
   
   3.3: Market Forecast 2016-2021
   
   3.3.1: Macroeconomic Forecast
   3.3.2: Forecast for the Global High Temperature Adhesive Market by Value and Volume
   3.3.3: Forecast for the North American High Temperature Adhesive Market by Value and Volume
   3.3.4: Forecast for the European High Temperature Adhesive Market by Value and Volume
   3.3.5: Forecast for the APAC High Temperature Adhesive Market by Value and Volume
   3.3.6: Forecast for the ROW High Temperature Adhesive Market by Value and Volume

4. Competitor Analysis

   4.1: Product Portfolio Analysis
   4.2: Market Share Analysis
   4.3: Operational Integration
   4.4: Porter's Five Forces Analysis

5. Growth Opportunity & Strategic Analysis

   5.1: Growth Opportunities Analysis
   
   5.1.1: Growth Opportunities for High Temperature Adhesives Market by Region
   5.1.2: Growth Opportunities for High Temperature Adhesive Market by Polymer Type
   5.1.3: Innovation in the Global High Temperature Adhesive Market
   
   5.2: Emerging Trends in the Global High Temperature Adhesive Market
   5.3: Strategic Analysis
   
   5.3.1: New Product Development
       ISO 9001:2008 certification for Germany in 2015
       ISO 9001:2008 certification for Germany in 2014
   5.3.2: Expansion Strategy
   
   5.4: Opportunities for the Global High Temperature Adhesive Market Across the Globe
   
   5.4.1: Product-Market Growth Strategy for the Global High Temperature Adhesive Market
5.5: Mergers and Acquisitions in the Global High Temperature Adhesives Market

6. Company Profiles of Leading Players
