Mobile Marketing Market by Solution, by User Type, by Vertical & by Region - Global Forecast to 2021

Description: “Increasing use of smartphones and tablets is driving the market”

Forecasts suggest the global mobile marketing market will grow from USD 28.63 billion in 2016 to USD 98.85 billion by 2021, at a Compound Annual Growth Rate (CAGR) of 28.1%. The mobile marketing market is growing rapidly because of the increasing number of mobile phone users, availability of high internet speed, and increasing usage of mobile web and mobile applications.

“APAC is expected to have the largest market share”

The APAC region is expected to be the largest revenue generator region for mobile marketing vendors for the next five years, followed by North America. The region of APAC is a highly receptive market with continual development in the mobile marketing technology, which is further enhanced with ongoing large-scale adoption of mobile marketing solutions. Increase in smartphone penetration, availability of mobile internet, more use of mobile applications and mobile web, and introduction of 4G network by the carriers, are some of the factors driving the mobile marketing market in APAC. APAC is also expected to contribute more than 50% of all new connections between now and 2021. Latin America is the fastest growing region in mobile marketing. Mobile internet usage in the region has been growing largely due to mobile device adoption and growth of the middle class society.

The study validates the market size of segments and sub-segments through secondary research and in-depth primary interviews. Various industry leaders in Tier 1, Tier 2, and Tier 3 companies were contacted for primary interviews. The in-depth interviews were conducted with CEOs, marketing directors, other innovation and technology directors, and executives from various key organizations operating in the mobile marketing marketplace.
