Global Paper and Paperboard Container and Packaging Market 2016-2020

Description: About Paper and Paperboard Containers and Packaging

Paper and paperboard packaging is gaining importance in many countries and is an emerging trend in the packaging industry because of its various advantages such as its environmentally friendly and cost-effective nature. Paperboard is thicker, with a high weight per unit area, and is made in multiple layers. The containers are generally made of virgin wood pulp, recycled paper stock, or other fibers. It is used to make containers such as boxes, cartons, and trays for packaging and shipping and is often used for packaging food. The various types of paperboard are chip board, fiber board, solid board, and white board.

The analysts forecast the global paper and paperboard container and packaging market to grow at a CAGR of 7.01% during the period 2016-2020.
