Education Hardware Market In India 2016-2020

Description:
About the Education Hardware Market

Educational institutions deploy hardware to fulfill the purpose of learning and education. In the past few years, the use of PCs has increased because of the evolution of the learning and teaching methodology. Educational institutions are developing innovative teaching methods and relevant IT tools for students and staff for improved efficiencies and learning processes. Increased demand for computers can be attributed to the high dependence on digitized education systems. This demand has influenced them to undertake initiatives to introduce computers and other hardware in their education systems and improve learning methodologies to remain at par with international education standards.

The analysts forecast the education hardware market in India to grow at a CAGR of 20.15% during the period 2016-2020.
