Global Steel Flat-rolled Products Market 2016-2020

About Steel Flat-Rolled Products

Flat-rolled products are made by rolling slabs on hot strip mills. These hot-rolled products are used for manufacturing cold-rolled products by further reducing the thickness without heat. The different forms of flat-rolled products are coils, sheets, strips, and plates. Flat-rolled products are widely used in many industries such as transportation, construction, packaging, and shipbuilding. Cold-rolled steels are ideal for applications such as electrical components, domestic appliances, and automobile manufacturing. These have excellent electromagnetic properties, forming properties, weldability, and printability.

The analysts forecast the global steel flat-rolled products market to grow at a CAGR of 1.92% by production during the period 2016-2020.
