Global Education Hardware Market 2016-2020

Description:
About the Global Education Hardware Market

Over the years, there has been a significant increase in the adoption of technology in the education sector globally. With an increase in investment by educational institutions to build IT infrastructure, there has been a noteworthy influence on the way education is imparted. As a result, the traditional classroom structure is gradually being replaced by other modes of education such as blended learning and collaborative learning.

Computing devices such as laptops are used for both academic as well as non-academic purposes. These solutions are incorporated in education systems to provide students with state-of-the-art education environment. Vendors are entering the market with the help of expertise in the fields of online content creation, delivery services, and software providers. Their ultimate goal is to deploy online learning into the classrooms. Vendors are continuously focusing on product innovations to reduce prices and enable mass adoption in education sector. In line with this, the education hardware employability is increasing.

The analysts forecast the Global Education Hardware Market to grow at a CAGR of 14.69% during the period 2016-2020.

Covered in this report
