Achieving Compliance with Robust CAPA Systems

Description: In order to solve problems every organization must know how to conduct an effective investigation, identify root causes, and implement workable corrective action in a timely manner. An effective CAPA process requires training internal investigators, who can also coach others in the organization, to employ critical thinking. The process must provide a common model and language within the organization, which allows investigators to master the process quickly and easily.

Objectives of the Presentation:

- Discuss what to do when problems occur
- Outline the requirements of the CAPA process and procedure including building a CAPA file
- Choose the most appropriate Root Cause Analysis methods for the situation
- Establishing a CAPA plan: project summary, individual responsibilities and expected completion dates
- Management and Oversight of the CAPA system and its documentation

Why Should you Attend:

This webinar will include discussions proper CAPA system maintenance, root cause analysis, documentation of the Corrective and Preventative Actions and developing a robust CAPA plan. It will give tips on how to develop CAPAs pertaining to longer term projects and ensure they stay on track.

Who can Benefit:

- Quality Control Personnel & Management
- Manufacturing Personnel & Management
- Senior Management
- Regulatory Affairs Personnel & Management
- Quality Assurance Personnel & Management
- Supplier Quality Personnel & Management

Topic Background:

In order to solve problems every organization must know how to conduct an effective investigation, identify root causes, and implement workable corrective action in a timely manner. An effective CAPA process requires training internal investigators, who can also coach others in the organization, to employ critical thinking. The process must provide a common model and language within the organization, which allows investigators to master the process quickly and easily.

Contents:

Definition of a CAPA
