How our Quality System Interrelates around CAPA, Change Control, and Risk Management

Description: The CAPA, Change Control and Risk management are all key quality systems that drive improvements and ensure process controls. While there are similarities and overlaps between these systems each has its own unique purpose. The challenge is to maintain all three processes without causing duplicate work. This webinar will discuss the values of each, how they can work together compliantly and why they need to be separate and unique.

Attendees will gain knowledge about:

- Basic overview of CAPA, Change Control and Risk Management
- Background information into why the regulations require three systems
- How to manage the integration of these systems into your company culture

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/3734846/](http://www.researchandmarkets.com/reports/3734846/)
