Global Gas Turbine Market 2016-2020

Description:

About the Gas Turbine Market

Gas turbines are used mainly in gas-fired power plants; these plants have an internal combustion engine wherein the fuel is mixed with air, leading to ignition. The resultant high-temperature gas is directed toward a gas turbine through a nozzle, which results in rotation of the turbine.

The analysts forecast the global gas turbine market to grow at a CAGR of 3.49% during the period 2016-2020.
