Supply and Demand of Glyphosate in China

Description:
This report mainly analyses the glyphosate industry of China from the aspects of supply, demand, price, consumption, export, as well as the future development at home and abroad.

From the report, you can
- Understand China's capacity, output and consumption of glyphosate from 2014 to 2015;
- Gain insight into the glyphosate manufacturers from the aspects of capacity, output, distribution and pathway;
- Realize glyphosate products' export circumstance;
- Get potential expansions of glyphosate capacity in detail;
- Use our long-term forecasts on glyphosate demand to adjust your strategy.

Glyphosate tolerant crops, the genetic modified crop (GM crop), is the major driver of glyphosate industry. Along with the increasing GM crop planting areas, the capacity of glyphosate kept increasing since 2012 in China because of the higher profit and larger demand. However, the capacity operating rate of glyphosate was low. The output of glyphosate decreased in 2015 while the capacity increased. How did all glyphosate producers in China operate in 2015? How did the export situation of glyphosate be in 2015? The GM crop keeps developing, while the glyphosate in China is overcapacity now, how will the development trend of glyphosate be from 2016 to 2020? Will the demand for glyphosate increase or decline?

To unfold the overall market of the China's glyphosate industry, the author has done deep research from the following aspects:
- Capacity, output and pathway of all producers in China, 2014-2015;
- Consumption and price of glyphosate in China, 2014-2015;
- Export of China's glyphosate by destination, 2014-Nov. 2015;
- Potential capacity of glyphosate in China;
- Forecast on glyphosate demand at home and abroad, 2016-2020.
