
Description: The HVAC markets in Australia and New Zealand are influenced by several factors such as: weather patterns, trends in consumer spending, structural factors, rising level of market penetration rates, and growth of modern technology platforms among others. The increasing demand of air conditioners in residential applications and escalating commercial constructions in southern New Zealand are some of the major factors contributing to developing a strong base for the growth of HVAC market. 

Government regulations and standards are sustaining the overall growth and development of the HVAC market. The consumers are directly benefited from these regulations as these devices save electrical energy and cuts down cost considerably. At present, government initiatives are focused towards launching new construction projects, supporting new installments and promoting HVAC equipments using renewable energy. 

Rising population, revival of the housing market, growing commercial and industrial units are some of the key drivers pushing towards the growth of the Australia and New Zealand HVAC markets. 

This study includes an overview and analysis of the HVAC market, by type of products mapped across Australia & New Zealand regions; allowing the researcher to develop a comprehensive outlook of the market. The HVAC market report presents a detailed analysis of the key market dynamics and provides an extensive insight into various forms of developments, trends and key participants. While highlighting the key driving and restraining forces for this dynamic market, the report also provides a comprehensive section of Porter’s Five Forces Model for in-depth analysis of the HVAC market and an assessment of the factors governing the same. The report builds itself upon a comprehensive value chain giving a clear understanding of ecosystem of HVAC market penetration. 

To present an overview and a comprehensive outlook of the HVAC market in the region, the study has been segmented according to different types of HVAC products including window & portable air conditioners, split air conditioners, single packaged units, chillers and fan coil unit (FCU) & air handling unit (AHU). 

The following key questions are answered in the “Australia & New Zealand HVAC Market, 2016-2022” report:
- What are the major types of HVAC products prevalent in Australia & New Zealand region?
- Who are the major players in Australia & New Zealand HVAC market and their respective company profiles?
- What are the key market developments and strategies of leading players in Australia & New Zealand HVAC market?
- What are major drivers, challenges and opportunities for Australia & New Zealand HVAC market?
- What is the market size (value and volume) of window and portable/moveable air conditioners in major countries across Australia & New Zealand?
- What is the market size (value and volume) of mini split systems in different countries across Australia & New Zealand?
- What is the market size (value and volume) of single packed systems in different countries across Australia & New Zealand?
- What is the market size (value and volume) of chillers in Australia & New Zealand HVAC market?
- What is the market size (value and volume) of both water–cooled and air-cooled AHU and FCU in different countries across Australia & New Zealand?

A clear understanding of the market dynamics, major drivers and the underlying threats and challenges that the HVAC market is subjected to, including the estimation of the industry's growth in terms of production and revenue would be gained. The report includes the profiles of major players in the HVAC market that allows the readers to gain an insight into the various major industry trends. Some of the leading companies in the Australia and New Zealand HVAC market are listed below:-
