Skin Diseases of Cattle in the Tropics

Description: Skin Diseases of Cattle in the Tropics is a clinical and practical guide to help animal scientists, field veterinarians, veterinary students, and technicians make appropriate and differential diagnoses. It features quizzes of clinical cases as well as multiple images of characteristic lesions and laboratory findings of major skin diseases (and diseases with skin manifestations) prevalent in tropical areas, notably the Sub-Saharan African countries. This self-learning and easy-to-use instructional guide, a unique offering in the field of animal science and veterinary medicine, provides essential and foundational information about the relevant skin condition, followed by illustrated flow charts of its laboratory diagnosis as well as a summary of the respective disease.

This title makes the subject accessible for practicing veterinarians and animal scientists, and is useful particularly for those who have neither seen nor have chance to see such diseases in the field or clinics. Such diseases are important not only in the tropics, but may be encountered in many countries in subtropical and temperate zones.

- Features more than 100 images of lesions and laboratory findings of major skin diseases and diseases with skin manifestations that are prevalent in tropical areas
- Includes clinical-case quizzes for self-directed learning
- Covers laboratory diagnosis, clinical presentations, and the summary of all important facts about the disease, including the etiology

Contents:

Section 1: Dermatitis and exudative dermatitis with scab formation Dermatophilosis (Streptothricosis) Dermatophycosis (Ringworm) Bovine besnoitiosis (Elephant skin disease) Sarcoptic mange (Scabies) Sarcoptic and demodectic mange (Mixed mange) Papilomatosis (Warts)

Section 2: Cutaneous and subcutaneous nodular swellings and abscesses Actinomycosis (Lumpy jaw) Bovine farcy (Nocardiosis) Skin tuberculosis (Tuberculous lymphadenitis) Lumpy skin disease (Chronic lesions) Demodectic mange (Demodicosis) Cutaneous hypodermatitis (Cattle grubs)

Section 3: Ulcerative skin lesions with bleeding and myiasis Cutaneous myiasis Photosensitization (Photosensitive dermatitis) Filarial dermatitis (Cutaneous parafilarosis) Tick infestation Bovine ulcerative mammillitis (Bovine Herpesvirus II)
