Smoke Detector Market by Power Source, Product, End-User Industry, Service, and Region - Global Forecasts to 2022

Description: The smoke detector market is expected to grow from USD 1.31 billion in 2015 to USD 2.52 billion by 2022, at a CAGR of 9.2% between 2016 and 2022. The smoke detector market is driven by factors such as increasing number of government mandate policies to install smoke alarms in residential sector, increased fire related expenditure of various enterprises and rise in deaths & loss of properties, and technological advancements have created higher level application for smoke detectors.

“Hardwired with battery backup detectors to witness highest growth during the forecast period”

The battery-powered smoke detectors need to be replaced frequently owing to exhausted battery or disposition of battery chemicals in the enclosure of the smoke detector which needs to be cleaned timely. Therefore, the demand for hardwired with battery backup smoke detector is gaining popularity among the customers and is expected to grow at the highest CAGR during the forecast period.

“Europe expected to witness highest growth during the forecast period”

Several European countries have submitted new smoke alarm regulations because of the increasing home fires that are causing many fatalities and casualties every year. The installation of smoke alarm has become obligatory by law in many parts of the Europe such as Austria, France, and Germany. The development and introduction of such laws is a considerable opportunity for manufacturers and installers.
