Beverage Dispensers Market - By Beverage (Alcoholic, Non-Alcoholic, Dairy); By Technology (Automated, Semi-Automated, Manual) By Component (Filtration, Blend & Mixing, Heat exchange, Carbonated) - Forecast (2016 - 2021)

Description: Beverages are the liquids specifically prepared for human consumption. All the beverages including juice, soft drinks, and carbonated drinks, have some water in them. The Beverage Dispenser is equipment used for dispensing drinks such as cool drinks, beers soft drinks among many others. These are commonly used in dispensing carbonated beverages by food operators. The beverage industry has a great deal of experience dealing with controlling and metering flow of beverage with reference the applicable codes and standards as needed. However, here have been little to no technological efforts being invested in the automation of a dispensing process of this nature.

The automated beverage dispenser is a self-contained unit that allows restaurants and bars to economically and efficiently dispense mixed drinks for their customers without additional staff. A simple touch screen computer allows the user, a waiter or bartender, to input the desired drink and the automated beverage dispenser will dispense the specified amounts of liquid that make up the drink recipe. Moreover, the touch screen computer also allows for the adjustment, addition, and subtraction of recipes and available liquids in the database.

The Beverage Dispenser processing equipment market is projected to reach around $XX billion by 2021, at a CAGR of around XX% from 2016 to 2021. The effect on the lifestyles in developing economies has up graded the market for packed beverages. The rise in consumer spending for fast moving consumer goods such as soft drinks and beer has driven the market for beverage processing equipment. The market players are responding to these new opportunities by expanding their global presence and product lines. Alcoholic beverage accounted for the largest share of the beverage processing equipment market in 2015. The non-alcoholic beverage market is projected to grow with the highest CAGR from 2016 to 2021.
