Antifoaming Agent Market by Type, Application & Region - Global Forecast to 2021

Description: The market size of antifoaming agent, in terms of value, is estimated to reach USD 6.59 billion by 2021 and is projected to register a CAGR of 3.8% between 2016 and 2021. The growing demand from major applications such as pulp & paper, oil & gas, paints & coatings, and water treatment is expected to drive the demand for antifoaming agent. The global demand of end-use applications such as papers, oil, processed food, and medicines are generating demand for antifoaming agent.

“Pulp & paper is expected to be the largest application during the forecast period”
Pulp & paper is expected to be the largest application between 2016 and 2021. The demand for this application is increasing mainly due to wide use of antifoaming agent in pulp & paper manufacturing. Water-based antifoaming agent is used in pulp & paper manufacturing. North America is the largest market for antifoaming agent in pulp & paper application.

“Asia-Pacific is projected to be the fastest-growing market during the forecast period”
Asia-Pacific is estimated to be the fastest-growing antifoaming agent market, in terms of both value and volume. The increasing demand of antifoaming agent from the pulp & paper and oil & gas applications and the growing paints & coatings industry are expected to drive the demand of antifoaming agent in the region.
