Corrugated Boxes Market by Material (Linerboard, Medium), Printing Ink (Water-Based, Solvent-Based, UV-Curable, Hot Melt-Based), Printing Technology (Digital, Flexography, Lithography), Type (Slotted, Telescope) - Global Forecast to 2021

Description: The global market for corrugated boxes is projected to grow from USD 63.29 billion in 2016 to reach USD 76.76 billion by 2021, at an estimated CAGR of 3.94%. The corrugated boxes market is driven by factors such as increasing urban population, demand for pharmaceutical supplies, and growth of the e-commerce industry. The market is further driven by factors such as increasing awareness among consumers about sustainable packaging and their pace of adopting such products is one of the biggest factors leading to increase in demand for corrugated boxes.

The flexography printing segment accounted for the largest market share in the next five years. The flexography printing is a quick and economical printing technique for printing on corrugated boxes. It helps to print images on uneven and rough substrates like corrugated boxes. Digital printing accounted for the second-largest market in 2015.

The slotted boxes segment accounted for the largest market share in 2015 in the corrugated boxes market. Slotted boxes are ideal for shipping a variety of products such as cups, mugs, and books among others. Slotted boxes are environmental friendly, as they generate minimal waste during its manufacturing process. This factor attracts the consumers, thus making slotted boxes the largest segment.

The Asia-Pacific region is projected to be the largest and the fastest-growing market during the forecast period, followed by Europe, from 2016 to 2021. In Asia-Pacific, China is the largest consumer for corrugated boxes, followed by Japan. China with rising food & beverage, and home & personal care goods will drive the corrugated boxes market. Japan with growing inclination toward convenient products will impact the corrugated boxes market in the Asia-Pacific region.
