Insulation Coating Market - Global Trends & Forecasts to 2021

Description: The insulation coatings market size is estimated to reach USD 8.29 billion by 2021 at a CAGR of 7.9% between 2016 and 2021. Energy saving, low thermal conductivity, high thermal co-efficient are the key properties of insulation coatings, which make it the preferred material for various applications.

Polyurethane insulation coatings are estimated to be the fastest-growing type in the insulation coatings market. The rising demand for insulation coatings with superior energy efficiency and operability at wide range of temperatures drives this segment in the insulation coatings market. Polyurethane insulation coatings are used in the residential, commercial, and industrial constructions. Polyurethane insulation coatings offer good dielectric properties with excellent humidity and are cost-effective. Polyurethane coatings are used widely for coating steel, concrete, wood, and drywalls.

In 2015, Asia-Pacific dominated the insulation coatings market due to rapidly increasing marine and aerospace industries. The Asia-Pacific region is projected to register the highest growth rate, in terms of both value and volume, owing to high demand from China and India. China is the largest market for insulation coatings globally with major demand from the manufacturing industry. Growing innovation and development and rising demand in the industrial sector for novel and improved products are directly affecting the rise in the use of insulation coatings. High growth and innovation, along with industry consolidations, are projected to ascertain a bright future for the insulation coatings market in the region.
