United States Credit Cards Usage Analytics: 2009 to 2019

Description:

Summary

United States Credit Cards Usage Analytics: 2009 to 2019; is an exhaustive research report outlaying Credit Cards usage in United States. The report provides year on year statistics on Number of Cards issued, Average Balance, Average Transaction value, Outstanding Balance, Frequency of use, Turnover, Value and Number of Transactions for the period 2009 to 2019.

Key Findings

The author considers Credit Card as a revolving payment card providing consumers with access to a line of credit. Consumers make payments using their card and receive a bill at the end of the billing cycle. The card issuer usually demands a minimum payment against the outstanding balance, but beyond this the customer can choose how much of the bill he wishes to repay, up to and including 100% of the balance outstanding. Any balances that are not repaid within the interest-free period offered by the card incur interest at the rate advertised by the card issuer. A revolving credit card may or may not be linked to a customer's bank account.

The report "United States Credit Cards Usage Analytics: 2009 to 2019" is the result of extensive market research covering the cards and payments industry in United States. It provides detailed historic and forecast statistics on credit cards usage along with all related parameters like Outstanding's, Average Transactions value and Number of Transactions, Turnover per card and many more.
