Global Chlorine Dioxide Generators Market By Type (2-Chemical, 3-Chemical and Electrochemical), By Application (Water and Wastewater Disinfection, Pulp and Textile Bleaching, etc.), By Region, Competition Forecast and Opportunities, 2011-2021

Description: Chlorine dioxide generators are being increasingly used as an alternative to chlorine generators in water treatment / disinfection processes as they release low quantities of toxic impurities into the atmosphere as compared to conventional chlorine based generators. This is anticipated to drive deployment of chlorine dioxide generators in various end user applications in the coming years.

Three types of chlorine dioxide generators used across the globe include 2-Chemical, 3-Chemical and Electrochemical generators. Increasing awareness about benefits of using chlorine dioxide generators coupled with continuing growth in end-user industries is expected to drive the chlorine dioxide generator market in the coming years.

Moreover, leading global players are developing novel technologies to improve various parameters such as cost effectiveness, handling and automation, which is further expected to aid adoption of chlorine dioxide generators over the next five years, worldwide.

According to “Global Chlorine Dioxide Generators Market By Type, By Application, By Region, Competition Forecast and Opportunities, 2011-2021”, the global market for chlorine dioxide generators is projected to grow at a CAGR of over 7% during 2016-2021, on account of increasing investments and favorable government initiatives. In 2015, Asia-Pacific dominated the chlorine dioxide generators market due to rising demand for these generators from China, India, Japan and Bangladesh.

Increasing government initiatives to encourage use of non-toxic reagents for water treatment and bleaching is expected to boost consumption of chlorine dioxide in the coming years. Few of the leading players operating in the global chlorine dioxide generators market include Prominent, Ecolab and Grundfos.
