India Accounting Software Market By Type (Enterprise Resource Planning Accounting Software, Commercial Accounting Software and Others), By End-user (Large, Medium and Small Enterprises), Competition Forecast & Opportunities, 2011-2021

Description: Accounting software is a type of computer software that enables bookkeepers and accountants to manage accounts and perform accounting operations of an organization in an effective and efficient manner.

Over the past few years, adoption of accounting software has been growing at a robust pace in India due to rising awareness about the benefits of using accounting software and surging demand for real time security.

In particular, large sized enterprises are the major end users of accounting software in the country. Nevertheless, increasing IT spending coupled with rising government support are expected to boost adoption of accounting software in small and medium sized enterprises as well across the country through 2021.

According to "India Accounting Software Market By Type, By End-User, Competition Forecast & Opportunities, 2011-2021", the country's accounting software market is projected to grow at a CAGR more than 14% during 2016-2021.

Growth in the market is anticipated on account of rising integration of accounting software with various online applications such as e-commerce, e-banking, etc., coupled with expanding cloud computing market, increasing demand for analytics and growing need of comprehensive functionality in accounting software.

In 2015, enterprise resource planning accounting software is the most used accounting software in the country. India accounting software market is quite fragmented market and has several leading players across the value chain.
