Global Human Albumin Market 2016-2020

Description:

About the Human Albumin Market

Albumin-based therapies such as Idelvion (CSL654 rIX-FP) by CSL Behring received marketing approval from the US FDA in March 2016 and from the EMA in May 2016. Apart from these, Albutropin (TV-1106) by Teva Pharmaceuticals, Ampion by Ampio Pharmaceuticals, and Albutein by Grifols (for Alzheimer’s disease) are expected to enter the market during the forecast period.

The demand for albumin is high in APAC in countries like India and China. Still, the uptake of these therapeutics is less due to the lack of awareness about these products and their therapeutic uses. Thus, the awareness programs conducted by organizations such as PPTA, which includes International Plasma Awareness Week, to help increase the awareness about plasma donation and the different plasma protein therapies available, along with their potential uses, is expected to increase the uptake of these therapeutics in treating various conditions.

The analysts forecast the global human albumin market to grow at a CAGR of 4.97% during the period 2016-2020.
