**Succinic Acid Market - Global Forecast to 2021**

**Description:**
Succinic Acid Market by Type (Bio-based, Petro-based), Application (Polyurethane, Resins, Coatings & Pigments, Pharmaceuticals, Plasticizers, Food & Beverage, PBS/PBST, Solvents & Lubricants, De-Icer Solutions, Personal Care, and Others), and by Region - Global Forecast to 2021

The global succinic acid market is projected to reach USD 701.0 million by 2021, registering a CAGR of 28.0% from 2016 to 2021. The market is projected to register a CAGR of 27.2% from 2016 and reach 251.3 kilotons by 2021. The increasing demand from the polyurethanes, plastic, and food packaging industries fuels the growth of the succinic acid market.

Bio-based succinic acids used in the PBS/PBST segment is also used in packaging of food, as these are non-toxic, biodegradable, and also have better heat resistance and processability in comparison to other biopolymers. They also provide high quality, low volatility, and durability to the plastics. The key drivers for the succinic acid market in this application segment are the increasing disposable income, changing consumer lifestyles, increased use of plastics, and the growing packaging industry. These factors have fueled the demand for non-toxic, bio-degradable PET bottles, food containers, disposable syringes, blood bags, and other consumer goods in countries such as China, India, Japan, the U.S., and Germany, among others that have led to the growth of succinic acid in the PBS/PBST application segment.

Asia-Pacific is the fastest-growing market of succinic acid, in terms of value and volume. High economic growth, growing manufacturing industries, cheap labor, increasing foreign investments, agreement/collaboration, expansion, increasing consumption of plastics, and a global shift in production capacity from the developed markets to emerging markets are the major factors leading to the growth of succinic acid in this region.

China dominates the succinic acid market in Asia-Pacific. Its consumption of succinic acid has grown significantly, and is expected to witness further growth in the near future. The rise in connectivity, growing levels of urbanization, and strong industrial base for the automotive, packaging, and construction industries are the driving factors for the growth of megacities, which lead to an increasing demand for succinic acid in the country.
