Cladding Systems Market by Material (Wood, Brick & Stone, Vinyl, Stucco & EIFS, Metal, Fiber Cement), Component (Walls, Roofs, Windows & Doors), Function (Insulation, Air & Vapor Control, Precipitation Control), by Application - Forecast to 2021

Description: The global market for cladding systems is projected to grow from USD 173.51 billion in 2016 to reach USD 242.84 billion by 2021, at an estimated CAGR of 6.95% from 2016 to 2021. Growth in the construction industry throughout the world as well as government regulations regarding zero energy building codes have played a huge role in providing the necessary momentum to the cladding systems market after the economic slowdown.

The metal cladding systems segment is projected to be the fastest-growing segment in the cladding systems market in the next five years. Metal cladding is durable and aesthetically pleasing. It is also eco-friendly and can be fully recycled. Metal cladding is mainly used in non-residential buildings, particularly in industrial and commercial.

The market for cladding systems is segmented on the basis of region into North America, Europe, Asia-Pacific, and the Rest of the World. North America accounted for the largest share of the total demand generated by the global cladding systems market in 2015 because of the willingness of companies in the region to take up capital-intensive projects, along with the availability of technical expertise. The Asia-Pacific region is projected to be the fastest-growing market for cladding systems during the forecast period, owing to the rising economy and the rapid growth in the infrastructure sector.
