Description:

Asia Pacific Open System MRI market is expected to grow at a CAGR of 8.8% to reach $220.9 million by 2020. MRI is a powerful diagnostic tool which is replacing CT because of its higher sensitivity and use of non-ionizing radiations. Open MRI is the more popular one between the two available systems of MRI, open and closed. Open MRI systems have a magnetic field in the top and bottom and do not enclose the patient in a tunnel. This prevents the patients becoming Claustrophobic. The Asia Pacific market mainly comprises of China, India, Japan, South Korea and Australia. China and India are the most populous countries in this region contributing to the increased demand for advanced healthcare facilities. There is also an increase in the incidence of diseases and cancers increasing the demand for advanced diagnostic tools like MRI. Japan holds a large share of the Asia Pacific market with a high per capita income and advanced technology. Australia also has a fast growing market with good healthcare facilities making technologies like Open System MRI more accessible. The market can be segmented based on the resolution (low-field, mid-field and high field), the applications (Neurology, Cardiology, Gastroenterology and Oncology) and geographically (China, Japan, India, South Korea, Australia and other countries). The key players in the industry are GE, Hitachi Medical Corporation, Philips Healthcare, Siemens Healthcare and Toshiba Medical Systems.

Drivers:

Advancement in technology and healthcare facilities has made this technology popular. It is not only safe but also preferred by all patients as it does not make them claustrophobic. It is more sensitive than CT. The growing aging population and higher incidence of diseases are drivers of this market.

Constraints:

The increasing number of accidents recorded in patients with implants such as pacemakers and cochlear implants. The technology also requires skilled professionals for performing the diagnosis and analyzing the results.
