Key Findings

The term “pay -now” is used to refer to any immediate debit card product. Pay-now cards allow customers to pay for purchases using a plastic card, with the funds for the transaction then drawn directly from their current/transaction/checking account. Customers verify payments either by signing a receipt, by entering a personal identification number (PIN), or for lower-value transactions, some debit cards allow contactless transactions without requiring a signature or PIN. A debit card does not offer access to a line of revolving credit and is always linked to a customer's personal banking account.

The report "Debit Cards Usage Analytics by Merchant Category: New Zealand" report is the result of extensive market research covering the cards and payments industry in New Zealand. It provides detailed debit cards usage statistics by merchant type on parameters like Average Transactions value and Number of Transactions, Frequency of Use, Turnover per card and Value of Transactions.
