Credit Cards Usage Analytics by Merchant Category: Sweden

Description:
Credit Cards Usage Analytics by Merchant Category: Sweden; is an exhaustive research report outlaying Credit Cards usage in Sweden. The report provides year on year statistics on Average Transaction Value, Frequency of Use and Number of Transactions, Turnover per card and more on market segments including Airline and Hotels, Books and Games including CD's/DVD's, Clothing and Footwear, Food and Beverages, Electrical Goods, Gardening Homewares, Health and Beauty, Motor Fuel, Mobile Top-ups, Downloads and others.

Key Findings

The author considers Credit Card as a revolving payment card providing consumers with access to a line of credit. Consumers make payments using their card and receive a bill at the end of the billing cycle. The card issuer usually demands a minimum payment against the outstanding balance, but beyond this the customer can choose how much of the bill he wishes to repay, up to and including 100% of the balance outstanding. Any balances that are not repaid within the interest-free period offered by the card incur interest at the rate advertised by the card issuer. A revolving credit card may or may not be linked to a customer's bank account.

The report "Credit Cards Usage Analytics by Merchant Category: Sweden" report is the result of extensive market research covering the cards and payments industry in Sweden. It provides detailed credit cards usage statistics by merchant type on parameters like Average Transactions value and Number of Transactions, Frequency of Use, Turnover per card and Value of Transactions.

"Credit Cards Usage Analytics by Merchant Category: Sweden" report acts as an essential tool for companies active across the Swedish cards and payments value chain and for new players considering entering the market. The comprehensive statistics within the report provides insight into the operating environment of Credit Cards in Sweden and also ensures right business decision making based on historical trends.
