Diesel Generators Market -By Power Rating (0-100kVA, 100-350kVA, 350-1000kVA, Above 1000kVA) By Application (Stand By Power, Peak Shaving, Prime / Continuous Power) By End Users & By Geography -Forecast (2016-2021)

Description: A diesel generator is the amalgamation of diesel engine with an electrically powered generator to produce energy. This is an explicit case of engine generator. These sets are used in place deprived of connection to power grid or as emergency power supply if grid fails, as well as for complex tenders such as peak-lopping, grid support and export to the power grid.

The factors on which the diesel generators be influenced by are ambient temperature, load on the generator, altitude of operation of the generator. These diesel generators are segmented based on their power range and their applications.

Owing to benefits such they are widely used in industrial applications because of their supreme reliability and low use of fuel. It also makes environmental friendly. They are safe to operate than gasoline-powered generators because diesel fuel is less flammable. They only require more than routine maintenance because of their simple design. They provide years of dependable services.

The global market for diesel generators was estimated to be $XX billion in 2015 and is estimated to grow at a CAGR of XX% and is forecast to reach $XX billion by 2021. The diesel generators are forecast to have the highest growth of XX% during the forecast period 2016-2021. Industrial and commercial industries are the major end-users for diesel generators.

Asia-Pacific (APAC) is the leading market for diesel generators in 2015. Asia region is forecast to have highest growth in the next few years due to developing acceptance of diesel generators in industrial and commercial applications. North-America is the second highest diesel generators market accounts to XX% of the global market for diesel generators and is growing market followed by Europe. North America and APAC alone are estimated to occupy a share of more than XX% during 2016-2021.
