
Description: Paper is an essential commodity with which all of us are closely associated in our daily life. Its socio-economic importance in the overall development of the country holds a significant place; this industry is directly linked with the industrial and educational growth in the country. Waste paper management can be accomplished by recycling the waste paper. Recycling is process of reusing the used materials (waste) by converting it into new and useful products. This is done to reduce the consumption of raw materials that would have been used. Recycling consumes less energy and offers a great way of controlling air, water and land pollution. Paper waste that can be recycled include books, newspapers, magazines, cardboard boxes and envelopes.

The waste paper management market is primarily driven by socio-economic factors such as increasing public awareness about environment. Moreover, Laws and regulations enforced by government is another major factor that compels paper and paper product manufacturers to reuse and recycle waste papers. Climate change across the world is also an emerging key driver for this market.
