Greece Tire Market Forecast & Opportunities, 2021

Description:

In 2009, Europe suffered one of the worst economic meltdowns, commonly referred to as the Eurozone Crisis. Though the crisis impacted the entire region, Greece was among the most severely affected countries. Due to economic slowdown, the country's economy suffered a slump, and multiple public as well as private banks declared bankruptcy, which impacted various sectors, consequently restraining growth in Greece's automobile and related components market over the last five years.

However, the country witnessed signs of revival in 2013 due to several bailout packages offered to Greece by the European Union and the International Monetary Fund (IMF). Consequently, the country's tire market also witnessed a rebound with sale of tires increasing across all the vehicle segments. To boost new vehicle sales, the Government of Greece introduced a policy initiative in 2009, wherein the government provided an incentive ranging from $670 to $3,740 for individuals scrapping their old vehicles for new ones. The scheme was in effect until the end of 2014.

According to “Greece Tire Market Forecast & Opportunities, 2021”, tire market in Greece is projected to cross $ 3.4 billion by 2021. The country's vehicle fleet is dominated by the passenger car segment, followed by the two-wheeler vehicle segment. Consequently, the passenger car tire segment held a share of more than 75% in the country's tire market in 2015 and its dominance is anticipated to continue during the forecast period as well.

Due to absence of automobile manufacturing in Greece, the tire market is entirely dependent on the replacement demand, which is being addressed by flagship as well as Chinese tire brands imported into the country. Few of the major companies operating in Greece tire market include Michelin, Bridgestone, Goodyear, Continental and Pirelli, among others.
