Report Description
This report examines the global digital breast tomosynthesis equipment market for the period 2016-2026. The primary objective of the report is to offer insights into advancements in the digital breast tomosynthesis equipment market that are significantly helping transform the breast imaging market.

The digital breast tomosynthesis equipment market report begins by defining mammography and its types. It also lists the various mammography techniques. This is followed by an overview of the global digital breast tomosynthesis equipment market.

The overview section includes analysis of key trends, drivers, restraints and opportunities influencing growth of the global digital breast tomosynthesis equipment market. Impact analysis of key growth drivers and restraints based on the weighted average model has also been included in the report to better equip clients with country-specific trends and insights.

Rising incidence of breast cancer in developing countries with increasing life expectancy and increasing adoption of unhealthy lifestyles are primary factors driving growth of the digital breast tomosynthesis equipment.

Hospitals and diagnostic centres are upgrading their existing digital mammography machines and installing new DBT equipment due to increasing evidences about effective combination of 2D and 3D mammography in cancer detection and reducing false positive call-backs. Combination of 2D and 3D mammography has become the new standard of care, since 3D mammography compliments conventional 2D mammography.

On the basis of product type, the market has been segmented into DBT equipment and 3D upgradation. A detailed analysis of all categories by product type, has been provided in terms of market size, Y-o-Y growth rate, absolute $ opportunity and BPS analysis.

On the basis of end user, the report has been segmented into hospitals and diagnostic centres. A detailed analysis of all categories by end user, has been provided in terms of market size, Y-o-Y growth rate, absolute $ opportunity and BPS analysis.
