Plumbing Fixtures Market by Material (Vitreous China, Metal, Plastics), Product (Bathtub & Shower Fixtures and Fittings, Sink Fixtures & Fittings, Toilet Fixtures & Fittings), Application (Renovated, New Buildings), End-Use - Forecast to 2021

Description:
The plumbing fixtures & fittings market is driven by factors such as rapid urbanization, building renovations due to disasters and upgradations, rising construction activities in emerging economies, and large-scale investments in the industrial and infrastructure sectors

"Vitreous china segment is projected to dominate the raw material market for plumbing fixtures & fittings in 2021"

Vitreous china as a raw material is projected to be the largest segment in the next five years. The most common and most economical material for domestic fixtures such as toilet bowls, urinals, and washbasins is vitreous china. One of the main advantages of vitreous glaze is its ability to resist spills and staining as a result of which modern manufacturers use the glaze owing to its advantages in the wet bathroom environment. It can also be used on larger stand-alone tubs and kitchen fixtures.

"Asia-Pacific region is expected to witness healthy growth during the forecast period"

The Asia-Pacific market is projected to be the fastest-growing market during the forecast period. Increasing population and rising income is increasing in this region, which in turn is accelerating the per capita spending on construction. The markets of China and India are projected to be lucrative due to their rising middle-class population and rising consumer spending on plumbing products.
