North America Cyber Security Market: Analysis and Forecast (2016 to 2022)

Description: With the rate of internet penetration reaching up to 87%, the U.S. has become one of the best connected countries in the world, and acquires the second position globally with regard to online business - consumer transactions; moreover, these factors have led the country to be the centre point for cyber attacks. Cyber crimes cost have reached around $100 billion in the country. Canada and Mexico globally stands at the 13th and 17th position respectively as major sources of cyber crimes. North America needs to build a strong resilience system for managing cyber crimes.

Our market study includes an extensive overview and analysis of the North America Cyber Security market by solutions and services, application verticals and countries, along with developing a comprehensive outlook of the market. The report provides extensive insights of the different developments, trends and key participants.

While highlighting the key driving and restraining forces for this market, the report also provides a comprehensive section on the prominent laws, patents and standards for the North America Cyber Security market.

The answers to the following key questions can be found in the report:
- What are the key market trends and developments in the North America Cyber Security market?
- What is the Cyber Security technological overview in the North America region?
- What are the different types of cyber attacks prevalent in the North America region?
- What are the key drivers, challenges and opportunities for the Cyber Security market in the North America region with respect to their impact analysis?
- Which key application vertical is utilizing Cyber Security in the North America region with their market statistics?
- What are the important Cyber Security solutions in the North America region with their market statistics?
- What are the important Cyber Security services in the North America region with their market statistics?
- Which North America country will lead the Cyber Security market by the end of the forecast period?
- Who are the key players in the North America Cyber Security market?

The research also incorporates Porter's Five Forces for an in-depth analysis of the North America Cyber Security market. The report builds itself upon a comprehensive value chain giving a clear understanding of the ecosystem of the Cyber Security market in the North America region. The report also includes the profiles of major players in the North America Cyber Security market that allows readers to get an insight into the industry trends.

Some of the leading companies in the North America Cyber Security market are IBM, Cisco, Dell, Intel, FireEye, Symantec, among others.

   1.6. Key Questions Answered in the Report
   1.7. Limitations

2. Market Overview
   2.1. Introduction
   2.2. Cyber Attacks Classification
2.3. Cyber Security Technological Overview

2.4. Market Dynamics
2.4.1. Market Drivers
   2.4.1.1. Introduction
   2.4.1.2. Increasing Cyber Attacks
   2.4.1.3. Government Acknowledgment and Support for Cyber Security
   2.4.1.4. Bring Your Own Device and Cloud Adoption
2.4.2. Market Challenges
   2.4.2.1. Introduction
   2.4.2.2. Lack Of Technical Expertise
2.4.3. Market Opportunities
   2.4.3.1. Introduction
   2.4.3.2. Technological Advancements Such as IoT

3. Competitive Overview
3.1. Key Market Development Trends
3.2. Partnerships and Collaborations
3.3. Product Launch
3.4. Acquisitions
3.5. Others (Contracts and Alliances Among Others)
3.6. Porter’s Five Forces Analysis
   3.6.1. Threat of New Entrants
   3.6.2. Bargaining Power of Buyers
   3.6.3. Bargaining Power of Suppliers
   3.6.4. Threat of Substitute Products or Services
   3.6.5. Rivalry Among Existing Firms

4. Industry Analysis
4.1. Laws/ Regulations/ Regulatory Bodies/ Act
4.2. Patents
4.3. Standards
4.4. Consortiums
4.5. Value Chain Analysis
