India Textile Chemicals Market by Product Type (Auxiliaries and Colorants), By Application (Apparel, Home Furnishing, Technical Textile), By Region, Competition Forecast & Opportunities, 2011-2021

Description: Textile chemicals are broadly divided in two categories, namely, auxiliaries and colorants; and are used to impart desired properties such as strength, color, flame resistance, etc. to the fabric. Auxiliaries are the chemicals used during each and every step of textile manufacturing process in order to impart certain characteristics to the fabric, while colorants are used to impart color to the textile products.

Government of India has been increasingly focusing on taking initiatives to make the country's textile industry more competent on the global landscape. Apart from increasing production capacity of textile products, the government is investing heavily to upgrade existing manufacturing technology required for textile production. Moreover, 100% FDI is allowed in the textile sector under the automatic route, which is further boosting the textile production, and consequently positively influencing the country's textile chemicals market.

According to “India Textile Chemicals Market By Product Type, By Application, Competition Forecast & Opportunities, 2011-2021”, textile chemicals market in India is projected to cross US$ 2.5 billion by 2021, on account of increasing industrialization, surging consumption of textiles in engineered products and rapidly rising awareness about the benefits of using textile chemicals. Apart from this, rising disposable income and increasing living standards are expected to significantly augment demand for textile chemicals in India over the next five years.

On the basis of product type, India textile chemicals market has been segmented into two categories, namely, colorants and auxiliaries. Among these categories, auxiliaries segment dominated the India textile chemicals market in 2015. Archroma India Pvt. Ltd, Huntsman International (India) Pvt.
