
**Description:**
Aerosol cans are used as a packaging product to dispense the contents with the help of a valve. Most of the cans are made using Aluminium, Steel, and Glass while the others are made with plastic.

The LATAM volume sale of aerosol cans was XX.XX Billion units in 2014 and is estimated to reach XX.XX Billion units by 2020, growing at X.XX% y-o-y, while in terms of revenue; the value was USD XX.XX Billion in 2014 and is estimated to grow at a rate of X.XX%, reaching USD XX.XX Billion in 2020.

Major end use industries are personal care and home care and thus, with increase in disposable income in the emerging countries, the growth of aerosol can market is expected to grow in line. On the other hand, pharmaceutical industry prefers to use aerosol cans as sprayers for pain relief medicines.

Big retailers like Wal-Mart, Target, etc. are driving the FMCG companies to better the packaging of the products in order to appeal to the customers within their limited available shelf space. This is pushing the companies to go for technological advancements in the aerosol can industry.
