Global Pellistor Bead Chemical Sensors Market

Description: Pellistors are solid-state devices used to detect gases which are either combustible or which have a significant difference in thermal conductivity to that of air. The growth of the pellistor bead chemical Sensors market is currently being hindered by decrease in automobile emissions testing due to the falling number of vehicles that need to be tested via the tailpipe. Asia Pacific is forecast to emerge as the fastest growing market with a CAGR of XX% during the period 2014 to 2020. The huge industrial base in Asia Pacific, especially in low cost Asian countries like China, India, Vietnam, Korea, and Malaysia, will help in boosting the demand of the market.

The Pellistor Bead Chemical Sensors market is estimated at $3.91 billion by 2018 at a CAGR of 6.62% over the period 2014-2020. The increasing use of universal exhaust gas oxygen sensors, inclination of growth towards motor vehicle market and demand for dissolved gases sensors are the key drivers which are making the pellistor bead chemical sensors market to grow lucratively.

The Pellistor Bead Chemical Sensors Market is segmented on the basis of Component (Detector, Compensator), End User Industry (Medical, Automotive, Industrial, Environmental Monitoring, Defense and Others), and Geography (North America, Europe, Asia Pacific, Latin America, Middle East and Africa).
