Clinical Trial Management System Market by End-user, Delivery Mode, Type, Component - Global Forecast to 2021

Description:
E-Coat Market by Type (Cathodic Epoxy, Cathodic Acrylic, and Anodic), Application (Passenger Cars, Commercial Vehicles, Automotive Parts & Accessories, Heavy-Duty Equipment, and Appliances), and Region - Global Forecast to 2021

The adoption of CTMS software is on the rise across the globe as these solutions significantly increase the efficiency and reduce the cost of conducting clinical trials. Factors such as increasing adoption of CTMS solutions during clinical trials, growing number of clinical trials, and rising R&D expenditure of pharmaceutical and biopharmaceutical companies are driving the growth of the CTMS market. However, dearth of skilled professionals to operate the advanced CTMS solutions and budget constraints of small- and medium-sized pharmaceutical and biotechnology companies and small CROs are restraining the growth of this market.

The global CTMS market has been segmented on the basis of end user (pharmaceutical and biopharmaceutical companies, contract research organizations, medical device companies, and others), type (enterprise CTMS and site CTMS), component (software and services), delivery mode (web-based (hosted) CTMS, licensed enterprise (on premise) CTMS, and cloud-based (SaaS) CTMS), and region (North America, Europe, Asia-Pacific, and the Rest of the World).

The contract research organizations segment is estimated to witness the highest growth rate in the global CTMS market, by end user, during the forecast period. Geographically, North America is expected to command the largest share of the global CTMS market in 2016, followed by Europe. The large share of the North American market is primarily driven by the rising number of ongoing clinical trials, rising government support for conducting clinical trials, and presence of a large customer base.

As of 2015, the global CTMS market was dominated by Oracle Corporation (U.S.), Medidata Solutions, Inc. (U.S.), and PAREXEL International Corporation (U.S.), that together accounted for ~60% of the market. New product launches; and partnerships, agreements, and collaborations are the major strategies adopted by market players to strengthen their presence and increase their share in the CTMS market.
