Description: The intellectual property (IP) rights & royalty management market is estimated to grow from USD 4.28 billion in 2016 to USD 12.68 billion by 2021, at a CAGR of 24.2% from 2016 to 2021. The intellectual property rights (IPR) & royalty management solutions help organizations manage issues related to inbound and outbound rights & royalties, with an aim of reducing legal implications and increasing revenues.

The IP rights & royalty management market by deployment type segmented into cloud/hosted and on-premises type. The cloud/hosted segment is expected to grow at a higher CAGR during the forecast period. This growth is attributed to the shift towards cloud/hosted solutions from on-premises across various organizations.

Among all the verticals, media & entertainment is one of the largest segments and is growing at a significant pace. This growth is attributed to the increasing necessity to monetize the contents for various broadcasting services such as TV broadcasting and over the top broadcasting.

The APAC region has been a potential market toward the adoption of intellectual property rights & royalty management solutions as countries such as the China, India, and Japan are adopting intellectual property rights & royalty management solutions to make better use of their assets. Also, companies operating in this market have started adopting these solutions to increase their operational efficiency, with better revenue management, royalty account management, and rights & contract management.
