Growth Opportunities for Adhesives in the Brazilian Automotive Industry 2016-2021: Trends, Forecast, and Opportunity Analysis

Description:

According to a new market report, the future of adhesives in the Brazilian automotive industry looks good with opportunities in the passenger car and light commercial vehicles. Adhesives in the Brazilian automotive industry are expected to reach an estimated $215 million by 2021. Adhesives in the Brazilian automotive industry are forecast to grow at a CAGR of 7.7% by value from 2016 to 2021. The major drivers of growth for this market are growth in the production of passenger car and light commercial vehicles, and increase in the demand for lightweight materials.

In this market, epoxy, polyurethane, and acrylic are the major adhesives by product type which are used in the automotive industry. On the basis of its comprehensive research, Lucintel forecasts that the polyurethane adhesives and epoxy adhesives segments are expected to show above average growth during the forecast period.

Polyurethane adhesive is expected to remain as the largest segment for adhesives in the Brazilian automotive industry. It has some better properties and growth in the vehicles production is expected to drive adhesive consumption, which would spur growth for this segment over the forecast period.

In this market, passenger car is largest segment by vehicle type and it is expected to remain as the largest segment due to increase in passenger car production and increasing use of lightweight materials in automotive applications.

Adhesive usage in non-structural application is expected to remain the largest segment due to its usage in bonding non-structural automotive parts made of lightweight materials.

For business expansion, report suggests innovation and new product development to reduce curing time, improve cohesion strength, and improved high temperature resistance. The report further suggests the development of partnerships with customers to create win-win situations and development of low-cost solutions for customers.

Emerging trends, which have a direct impact on the dynamics of the industry, include increasing use of composites and lightweight materials in vehicles and development of new silicone-based electrically conductive adhesives in automotive sensor applications. Henkel AG & Co KGaA, 3M Company, Dow Chemical Company, Sika AG., and H.B. Fuller Co., are the major suppliers of adhesives in the Brazilian automotive industry. Some companies are opting for merger & acquisition as strategic initiatives for driving growth.

The report analyzes growth opportunities for adhesives in the Brazilian automotive industry by product type, vehicle, and application type and has come up with a comprehensive research report, “Growth Opportunities for Adhesives in the Brazilian Automotive Industry 2016-2021: Trends, Forecast, and Opportunity Analysis.” The report serves as a spring board for growth strategy as it provides a comprehensive data and analysis on trends, key drivers, and directions. The study includes a forecast for the growth opportunities for adhesives in the Brazilian automotive industry by product type, vehicle, and application type as follows:

By Product Type [Volume M lbs. and $ M Shipment analysis for 2010 to 2021]:
- Epoxy Adhesives
- Polyurethane Adhesives
- Acrylic Adhesives
- Other Adhesives

By Vehicle Type [Volume M lbs. and $ M Shipment analysis for 2010 to 2021]:
- Passenger Cars
- Light Commercial Vehicles

By Application Type [Volume M lbs. and $ M Shipment analysis for 2010 to 2021]:

- Structural Components
- Non-Structural Components

This report answers following 10 key questions:

Q.1. What are some of the most promising, high-growth opportunities for adhesives in the Brazilian automotive industry by product type, by vehicle type, and by application type?

Q.2. Which product segments will grow at a faster pace and why?

Q.3. What are the key factors affecting market dynamics? What are the drivers and challenges of the market?

Q.4. What are the business risks and competitive threats in this market?

Q.5. What are emerging trends in this market and reasons behind them?

Q.6. What are some changing demands of customers in the market?

Q.7. What are the new developments in the market? Which companies are leading these developments?

Q.8. Who are the major players in this market? What strategic initiatives are being implemented by key players for business growth?

Q.9. What are some of the competitive products and processes in this area and how big of a threat do they pose for loss of market share via materials / product substitution?

Q.10. What M & A activity has transpired in the last 5 years in this market and what is its impact on the industry?

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today’s stringent economy, you need every advantage that you can find.

To make business, investment, and strategic decisions, you need timely, useful information. This market report fulfills this core need and is an indispensable reference guide for multinational materials suppliers, product manufacturers, investors, executives, distributors, and many more that operate in this market.

Some of the features of “Growth Opportunities for Adhesives in the Brazilian Automotive Market 2016-2021: Trends, Forecast, and Opportunity Analysis” include:

Market size estimates: Growth opportunities for adhesives in the Brazilian market size estimation in terms of value ($M) and volume (million pounds) shipment.

Trend and forecast analysis: Adhesives in the Brazilian automotive market trend (2010-2015) and forecast (2016-2021) by product type, vehicle type and application type.

Segmentation analysis: Adhesives in the Brazilian automotive market size by various product type (epoxy, polyurethane, acrylic and other), vehicle type (passenger car (suv & car) and light commercial vehicle) and by application type (structural, non-structural, interior and exterior) in terms of value and volume.

Growth opportunities: Analysis on growth opportunities by products type and vehicle type.

Strategic analysis: This includes M&A, new product development, competitive landscape, and expansion strategies for adhesives in the Brazilian automotive market suppliers.

Emerging applications: Emerging applications of adhesives in the Brazilian automotive market.

Analysis of competitive intensity of the industry based on Porter’s Five Forces model.

Contents: 1. Executive Summary
2. Industry Background and Classifications

2.1: Introduction
2.1.1: Applications of Adhesives in the Brazilian Automotive Industry
2.1.2: Classification of Adhesives in the Brazilian Automotive Industry by Product Type
2.1.3: Advantages of Adhesive Usage
2.1.4: Difficulties in Adhesive Usage
2.1.5: Comparison of Adhesives with Mechanical Fasteners (Substitutes)
2.2: Supply Chain

3. Market Trends and Forecast Analysis

3.1: Market Analysis 2015
3.1.1: Adhesives in the Brazilian Automotive Industry by Value and Volume
3.2: Market Trends from 2010 to 2015
3.2.1: Macroeconomic Trends
3.2.2: Trends of Adhesives in the Brazilian Automotive Industry by Value and Volume
3.2.3: Industry Drivers and Challenges
3.3: Market Forecast from 2016 to 2021
3.3.1: Macroeconomic Forecasts
3.3.2: Forecast for Adhesives in the Brazilian Automotive Industry by Value and Volume

4. Competitor Analysis

4.1: Product Portfolio Analysis
4.2: Porter’s Five Forces Analysis

5. Growth Opportunity and Strategic Analysis

5.1: Growth Opportunity Analysis
5.2: Emerging Trends in the Brazilian Automotive Adhesives Industry
5.3: Strategic Analysis

6. Company Profiles of Leading Players
