Global Cased hole Logging Services Market Outlook - Market Analysis by Geography, Type of Wireline (E-Line, Slickline), Competitive Landscape, Key Company Information - Growth Trends and Forecasts (2016 - 2021)

Description:
Cased-hole logging involves retrieving logging measurements through the well casing, or the metal piping that is inserted into the well during completion operations. Cased-hole logging is performed more rarely but still provides valuable information about the well.

Cased-hole logging is used to help operators obtain additional information from a well or reservoir that has already been completed. For example, the well may have already started production and a cased-hole log could help determine what has hampered flow. In some cases, the decision must be made to plug and abandon the well or recomplete it, and the cased-hole log will help identify what lies beyond the casing of the well.

Cased-hole logging can be used to evaluate the formation and completion of the well, as well as determine the state of the cement, corrosion and perforation. Both gamma ray and neutron porosity logs can be run through the casing of a well, and better ideas of thermal decay and interval transit time can be achieved through porosity and hydrocarbon saturation.

What the Report Offers

- Market Definition for the Global Cased hole logging services along with identification of key drivers and restraints for the market.

- Market analysis for the Global Cased hole logging services market, with country specific assessments and competition analysis on both country and regional scale.

- Identification of factors instrumental in changing the market scenarios, rising prospective opportunities and identification of key companies which can influence the market on both country and regional scale.

- Extensively researched competitive landscape section with profiles of major companies along with their share of markets.

- Identification and analysis of the Macro and Micro factors that affect the Global Cased hole logging services market on both country and regional basis.

- A comprehensive list of key market players along with the analysis of their current strategic interests and key financial information.

Reasons for Buying this Report

For gaining an exhaustive understanding of the worldwide market for Cased hole logging services. Would be of assistance in providing a comprehensive analysis of the major trends, innovations and associated prospects for market growth over the coming half a decade
