Shotcrete/Sprayed Concrete Market by Process (Wet & Dry), Application (Underground Construction, Water Retaining Structures, Protective Coatings, Repair Works), System (Robotic and Manual), and Region - Global Forecasts to 2021

Description: The market size of shotcrete/sprayed concrete is projected to reach USD 8.30 billion by 2021, registering a CAGR of 8.0% from 2016 to 2021. Rapid technological developments in shotcrete fuel the growth of the shotcrete/sprayed concrete market.

Underground construction is the largest as well as fastest-growing application of the shotcrete/sprayed concrete market, followed by water retaining structures, repair works, protective coatings, and others (free formed structures and new constructions). Growth in underground constructions is primarily driven by increasing urbanization, fast growing economic development, underground construction, and transportation facilities, mainly in developing countries such as India, the Philippines, Egypt, and Indonesia.

Europe is the largest market for shotcrete, which accounted for the maximum share of the overall market size, in terms of value, in 2015. This large market share is attributed to rapid developments in shotcrete technology and raw materials, and increase in tunneling and mining activities. Asia-Pacific is the fastest-growing market, in terms of value, owing to rise in population and increase, consumer preferences, and urban lifestyle.

This study has been validated through primaries conducted with various industry experts globally. These primary sources have been divided into three categories, namely, by company, by designation, and by region.
