Geography - Global Forecast to 2022

Description: According to the new market research report on Class D audio amplifier, this market is expected to be worth USD 2.76 billion by 2022, growing at a CAGR of 17.4% between 2016 and 2022. The growth of the Class D audio amplifier market can be attributed to the increasing demand for Class D audio amplifier technology in consumer electronics and automotive applications. However, the issue of interface integration in various audio devices poses a restraint for the growth of the Class D amplifier market.

2-Channel Class D audio amplifier held the largest market share in 2015 and is expected to grow at the highest CAGR during the forecast period as it is commonly used in in-car audio and television sets. The increase in the demand for ultra-high definition television and in-car audio system is driving the growth of the Class D audio amplifier market.

The Class D audio amplifier for television holds the largest market share in 2015. The advent of technology has increased the demand for slim television sets such as LED, LCD, and OLED television. These televisions use the Class D audio amplifier technology for audio output because of its compact size and high efficiency which, in turn, is increasing the demand for Class D audio amplifiers in television sets.

This report covers the Class D audio amplifier market in regions including North America, Europe, Asia-Pacific, and Rest of the World (RoW). The market in APAC is expected to grow at a high CAGR between 2016 and 2022. The major reason for the growth of Class D audio amplifier market in APAC is that it is one of the largest producers of smartphones and televisions in the world. Moreover, APAC is the major automotive production hub in the world, which boosts the market for Class D audio amplifiers in automotive applications such as speakers, subwoofers, and others.
