Global Hoverboard Market - By Hoverboard Type (wheel size - 6.5 inch, 8 inch and 10 inch), By Region (North America, South America, Europe, Asia-Pacific and Rest of the World), Competition Forecast & Opportunities, 2021

Description: Hoverboard is a battery operated, two-wheeled self-balancing device that is used for personal transportation. It is also referred to as a self-balancing electric scooter, or electric skateboard, or hands-free Segway (traditional Segway's with handles are not included in this definition).

Rider or the operator stands on the hoverboard with both feet and have to use their body weight to control movement of hoverboard. Over the past few years, demand for hoverboards increased owing to growing use of hoverboard for personal mobility, as well as for recreational activities across the globe. Moreover, rising interest of people in battery operated self-balancing scooters, coupled with growing youth population are further anticipated to drive global hoverboard market during the forecast period.

According to the report, "Global Hoverboard Market By Type, By Application, By Region, Competition Forecast & Opportunities, 2015-2021", the hoverboards market is projected to surpass $1.8 billion by 2021, owing to expanding youth population, increasing adoption of hoverboards for personal mobility and recreational activities. Moreover, 6.5 inch hoverboard dominated global hoverboard market in 2015, and same trend is further anticipated to continue during the forecast period, on account of it's low price and easy availability.

Asia-Pacific region accounted for largest share in global hoverboard market in 2015, and the region is forecast to continue its dominance during the forecast period as well due to increasing demand from countries such as China, Japan, Australia, Singapore, Malaysia.
