North America Location Analytics Market (2016-2022)

Description: Location analytics is a system designed to interpret and analyze information in conjunction with a Geographic Information System (GIS), with a visual representation. The System can be implemented into both real-time geographical data and historic geographical data. The location analytics market consists of various types of tools such as geocoding & reverse geocoding, data integration & ETL, reporting & visualization, and thematic mapping & spatial analysis. The location analytics tools can be successfully integrated into real-time analytics tools as well as real-time guidance tools. The integration empowers end users to take the appropriate and timely actions in real-time operations. The location analytics market also consists of various services such as consulting services, system integration services, and support & maintenance services. Real-time location analytics can be effectively implemented in verticals such as government & defense, retail & consumer goods, energy & utilities, manufacturing, and healthcare.

The report highlights the adoption of Location Analytic.
