Global Hazardous Waste Handling Automation Market By Products, Type of Waste, End User Industry, Geography, Vendor Analysis Forecasts and Trends (2016 - 2021)

Description: The Global Hazardous Waste Handling Automation Market is expected to grow at a CAGR of 8.50% for the period 2014 - 2019. Hazardous waste management is the collection, disposal and treatment of harmful materials. If improperly handled, it can cause substantial harm to human health and the environment. These include waste materials generated on a day today basis by people, power plants, and manufacturing companies.

Some of these wastes can be handled manually while some may require expertise and automation solutions to minimize human contact with the waste. Use of such automation solutions for handling waste also improves the process efficiency and reduces the reliability on manual intervention. Thus, concerns about proper handling of these harmful substances can be eliminated.

Hazardous wastes pose enormous threats to public health. It has to be treated, recycled and disposed effectively in order not to pollute the environment. Growing awareness has brought government’s attention towards legislations which can help in effective tackling of these wastes. This also helps in controlling the expenditure towards healthcare treating after effects of these hazardous wastes on population. Growth in awareness and the changing environmental conditions are expected to drive the Global Hazardous Waste Handling Automation Market.

This report talks about the key factors that contribute to the growth in the Global Hazardous Waste Handling Automation Market, discussing the trends, technology overview providing the recent developments and the products available in the market. To discuss this, the market has been segmented based on types into manipulator arms market, telescoping masts market, cranes market, trusses market, size reduction systems market. The market is also classified based on the type of hazardous waste, that is, Listed Wastes, Characteristic Waste, Universal Wastes, and Mixed Wastes. It also provides region and country specific forecasts of the market, giving a detailed insight on the market's performance. In addition it also talks about the competitive landscape, some of the key players discussed in the report are PAR Systems, Konecranes, DX Engineering, Floatograph ® Technologies, among others.

SPECIALITIES OF THIS REPORT:
- The report will be useful in gaining an exhaustive understanding of the regional market. It will also be of assistance in providing a comprehensive analysis of the major trends, innovations and associated prospects for market growth over the coming half a decade
- The report will be an ideal source material for industry consultants, manufacturers and other interested and allied parties to gain a critical insight into the factors driving and restraining the market, in addition to opportunities offered.
- The report contains wide range of information about the leading market players and the major strategies adopted by them.

WHAT THE REPORT OFFERS:
- Market Definition along with identification of key drivers and restraints for the market. Market analysis with region specific assessments and competition analysis on a global and regional scale.
- Identification of factors instrumental in changing the market scenarios, rising prospective opportunities and identification of key companies which can influence the market on a global and regional scale.
- Extensively researched competitive landscape section with profiles of major companies along with their strategic initiatives and market shares.
- Identification and analysis of the Macro and Micro factors that affect the industry on both global and regional scale.
- A comprehensive list of key market players along with the analysis of their current strategic interests and key financial information.

Contents:
1. Introduction
   1.1 Key Findings
   1.2 Research Methodology
2. Executive Summary
3. Market Insights
   3.1 Market Overview
   3.2 Factors Driving the Market
      3.2.1 Government and Industry Regulations
      3.2.2 Growing concern about the waste management
   3.3 Factors Restraining the Market
      3.3.1 The economic activity still has to pick up in several countries owing to global recession of 2008
      3.3.2 The market has reached stagnant position in several developed countries. Vendors have to look out for new avenues for their products
   3.4 Hazardous Waste EPA Classification
      3.4.1 Listed Wastes
      3.4.2 Characteristic Wastes
      3.4.3 Universal Wastes
      3.4.4 Mixed Wastes
      3.4.5 Industry Value Chain Analysis
   3.5 Industry Attractiveness - Porter's Five Forces
      3.5.1 Bargaining Power of Suppliers
      3.5.2 Bargaining Power of Consumers
      3.5.3 Threat of New Entrants
      3.5.4 Threat of Substitute Products or Services
      3.5.5 Competitive Rivalry among Existing Competitors
4. Technology Overview
   4.1 Technology Snapshot
   4.2 Types of Hazardous Waste Handling Automation Products
      4.2.1 Manipulator Arms
      4.2.2 Telescoping Masts
      4.2.3 Cranes
      4.2.4 Trusses
      4.2.5 Size Reduction Systems
      4.2.6 Others
   5.1 Listed Wastes
      5.1.1 Overview
      5.1.2 Market Analysis
   5.2 Characteristic Waste
