
Description: Plastic caps/closures are manufactured by either injection molded process or compression molded process. These plastic caps/closures are manufactured using various raw materials (resins) like PET, PP, HDPE, LDPE, and others. Of the total caps and closures market, plastic caps and closures have 70% of the market share. The rest is split between, metal, metal-plastic, and rubber/cork.

The global production of plastic caps and closures in 2016 was 1,286 billion units and is estimated to reach 1,814 billion units by 2021, at a CAGR of 5.89%, while in terms of revenue, the market was worth USD 29.34 billion in 2016 and is projected to reach USD 38.5 billion in 2021, at a CAGR of 4.63%.

Beverages industry lead the plastic caps and closures market in 2014 while, at the same time, high growth is expected to be observed in the bottled water segment across the globe driving the demand for plastic caps and closure products. Factors like innovative/customized products tamper evident, child-resistant, and others are the driving factors of plastic caps and closures market. On the other hand, pharmaceutical regulations on PET bottles (in countries like India) are a constraint to the market.

The market is highly fragmented with the top five players holding just 15-18% of the global market share. As a result of a vast number of suppliers, the industry is witnessing consolidation among players to increase the market penetration (especially big/global companies acquiring small/local companies).

DRIVERS
- Innovative products

RESTRAINTS
- Increase in raw material prices
- Regulations on usage of PET bottles/caps for pharmaceutical drugs

What the report offers
