North America Wireline Logging Services Market Outlook - Market Analysis by Geography, Type of Wireline (E-Line, Slickline), by Hole Type, Competitive Landscape, Key Company Information - Growth Trends and Forecasts (2016 - 2021)

Description: Geographically, North America has the major market share for global wireline services market. The strong research and development practices in the North American region have helped the market to grow. Also, the favorable regulations have helped the North American market to propel to the level of market leader in global wireline services market. However, the mature wireline services market in this region is subjected to stiff competition.

Generally every oil well drilling starts when it is uncased. And the surface casing will be installed once a short distance is drilled, to protect the softer surface formations without caving. Number of casings installed will depend upon the total depth of the well and type of rock formation. After reaching the total depth, a log will be run to determine whether the well is economical to produce and also to determine the exact depth of the well.

There are two types logging operations performed in a well:

Open-Hole Logging

Cased-Hole Logging

Open-Hole logging generally refers to logging operations that are performed on a well before the wellbore has been ceased and cemented. On the other hand, cased-hole logging involves retrieving logging measurements through the well casing, or the metal piping that is inserted into the well during completion operations.

Increasing energy demand, increasing exploration activity in deeper waters, shale boom and rise global well intervention demand are the major drivers for Wireline logging services market. On the flip side, lack of skilled labor and need for initial technical equipment are some of the factors restraining the market.
