Global Organic Food Market By Product Type (Organic Meat, Poultry and Dairy; Organic Fruits and Vegetables; Organic Processed Food; etc.), By Region (Europe, North America, Asia-Pacific, etc.), Competition Forecast and Opportunities, 2011-2021

Description:
Increasing health concerns due to growing incidences of lifestyle diseases such as diabetes, blood pressure, heart problems, etc., and rising awareness about harmful effects of consumption of synthetic ingredients and pesticides boosted demand for organic food across the globe, during 2011-2015.

Further, rising focus of government organizations and organic food manufacturers towards promoting benefits associated with organic food consumption, growing annual per capita spending on food, easy availability of organic food products and infrastructural developments in supply chain and distribution network are projected to augur well for global organic food market over the course of next five years.

According to “Global Organic Food Market By Product Type, By Region, Competition Forecast and Opportunities, 2011-2021”, global market for organic food is projected to grow at a CAGR of over 14% during 2016-2021, on account of high demand for organic food in retail stores, restaurants, schools and office cafeterias.

Europe dominated demand for organic food across the globe and the region is projected to continue dominating the market through 2021. Further, organic fruits & vegetables dominated global organic food market, due to high content of protective antioxidants, less pesticide residue and low level of toxic chemicals in organically cultivated fruits & vegetables. White Wave Foods, Hain Celestial, General Mills, UNFI, Sprouts Farmers Market and Edeka Group are few of the major players operating in global organic food market.
