Crude Sulfate Turpentine Market by Type (Alpha Pinene, Beta Pinene, Delta 3 Carene, Camphene, Limonene), Application (Aromatic Chemicals, Adhesives, Paints and printing inks, Camphor), and Region - Global Forecast to 2022

Description: “Crude sulfate turpentine market is projected to grow at a CAGR of 4.10%”

The crude sulfate turpentine market is valued at USD 213.87 million in 2015, is projected to grow at a CAGR of 4.10%, to reach USD 279.5 million by 2022. The market is primarily driven by factors such as increasing usage of fragrance ingredients that include crude sulfate turpentine derivatives. Asia-Pacific is projected to be the fastest growing region due to the high paper production that further supports the refining companies to obtain black liquor at relatively low prices and in turn derive crude sulfate derivatives. One of the major restraints in the growth of the crude sulfate turpentine market is the high dependence for black liquor on the paper industry as well as the lack of control on the quality of the crude sulfate turpentine manufactured by paper manufacturers.

“Alpha-pinene segment led the market with the largest share in 2015”

On the basis of type, the crude sulfate turpentine market was led by the alpha-pinene segment, followed by beta-pinene and delta-3-carene. Alpha pinene is increasingly used globally in various applications such as aromatic chemicals, adhesives, paints and printing inks, and camphor among others. Alpha-pinene is consumed on a large scale across regions due to its bulk production and broad applicability.

“Camphor segment is projected to be the fastest-growing application market”

The camphor segment dominates the crude sulfate turpentine market due to the large-scale availability of camphor, which in turn drives the demand for the crude sulfate derivatives across the globe. The camphor application segment is projected to witness high growth owing to the high demand in the European and RoW regions.

“Asia-Pacific: High growth is expected in the crude sulfate turpentine market”

Asia-Pacific is projected to be the fastest-growing market for the period considered for this study, due to the increasing middle class population, coupled with growing demand for free moving consumable goods in the region. India and the Rest of Asia-Pacific are expected to lead the market for crude sulfate turpentine in the Asia Pacific region for the next six years, as a result of the expanding personal care industry which requires crude sulfate turpentine derivatives in order to cater to the domestic demand for personal care products.
