Scabies Treatment Market: By Administration (Oral, Topical) By Medication (Ointment, Combinational Medicine) & By Geography (Europe, Asia Pacific, North America, Rest of the World)-Forecast (2016-2021)

Description:
Scabies is an infectious skin disease caused by microscopic mites known as Sarcoptes scabiei, which are found inside human skin. These Sarcoptes scabiei mites burrows into the skin and lay eggs after staying for two to three weeks. Scabies is diagnosed by an itchy feeling, rash and pimple like skin disease condition. Scabies is a highly contagious disease and can pass through simple contact with affected person. The disease is pruritic in nature. The common sites for the rash are wrist elbow, armpit, waist, area between the fingers. Globally increasing awareness and easing access for treatments in major developing nations is expected drive the demand for scabies treatment during the period of study.

Geographically Asia-Pacific dominated scabies treatment market owing to the large population base which makes infectious diseases spread easily and less awareness amongst people about preventive measures for such diseases. Asia-Pacific was followed by Latin America and North America as second and third largest market for scabies treatment market. Asia Pacific is projected to have fastest growth, owing to rapidly increasing industrial healthcare infrastructure increasing awareness amongst people in the region especially in developing nations such as China, and India in this region.
